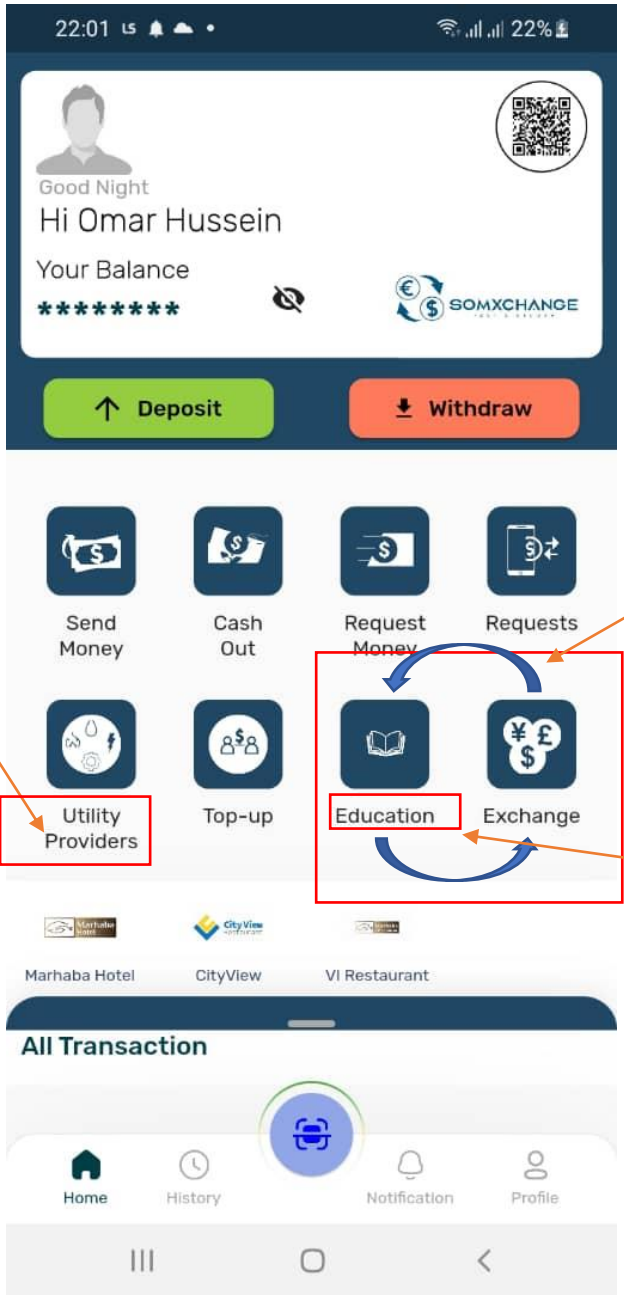
1. App firebase notification is not working when receive payment or receive notifications. *Pending*
2. SMS notification and email notification are not working when user send money or withdraw money. *Pending*
3. Mini statement report for user need to check transaction history or downloads reports *Pending*

Main points we need to do some changes following items.



For these items we need to do modification.

1. **Utility Providers**
2. **Top-Up**
3. **Education**
4. **Exchange**

Change to **Bill Payments**

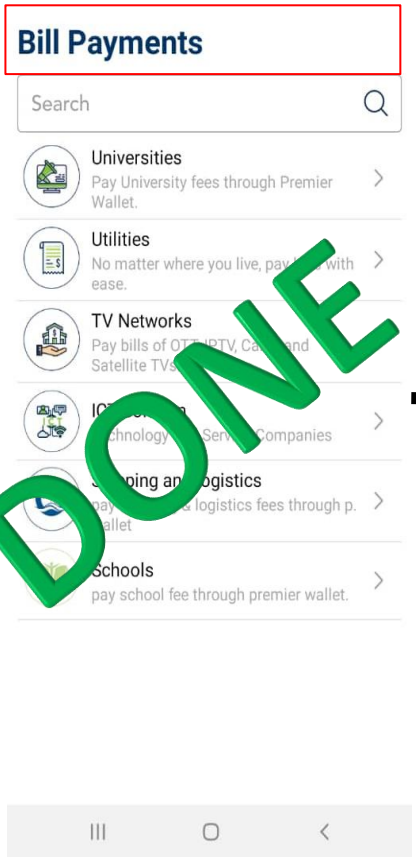
Change or swap menu button location/position

Change to **Banking**

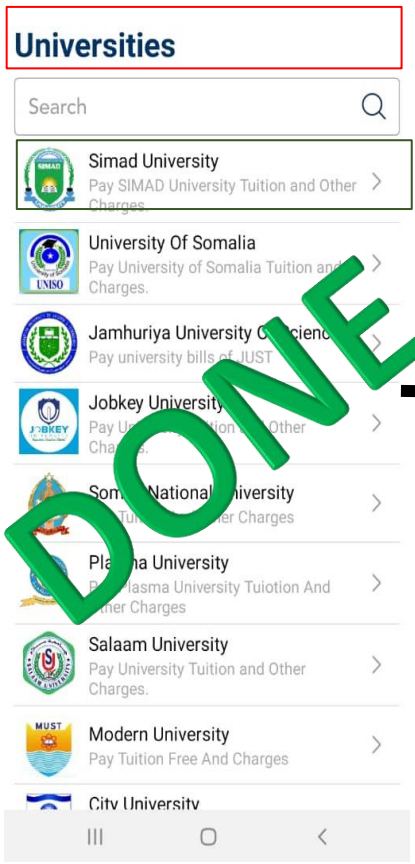
1. **Utility Providers**

    4. We need to change the provider design on these below screens.

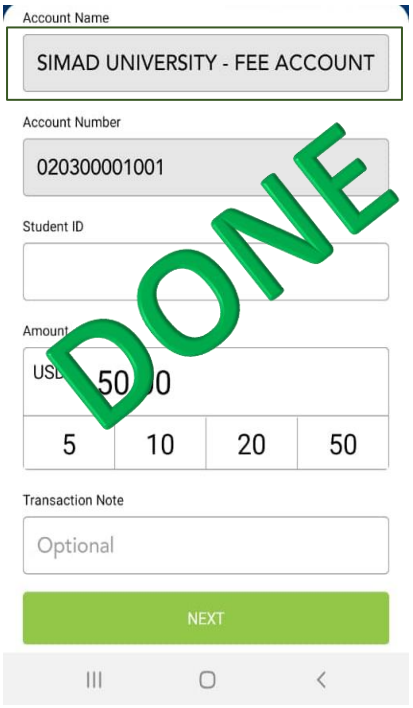
Screen1



Screen2



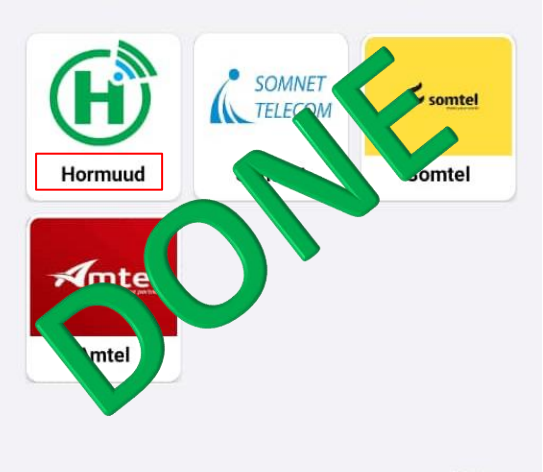
Screen3



2. Top-Up

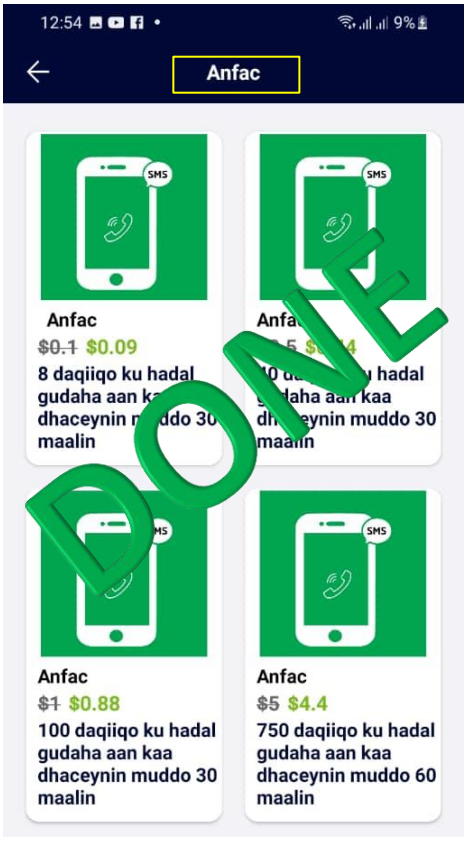
5. We need to make modifications for top-up activity so we didn't get api from providers until now so we need to jump api, so we need to do it by manual. As the below images.

Screen1



Screen2

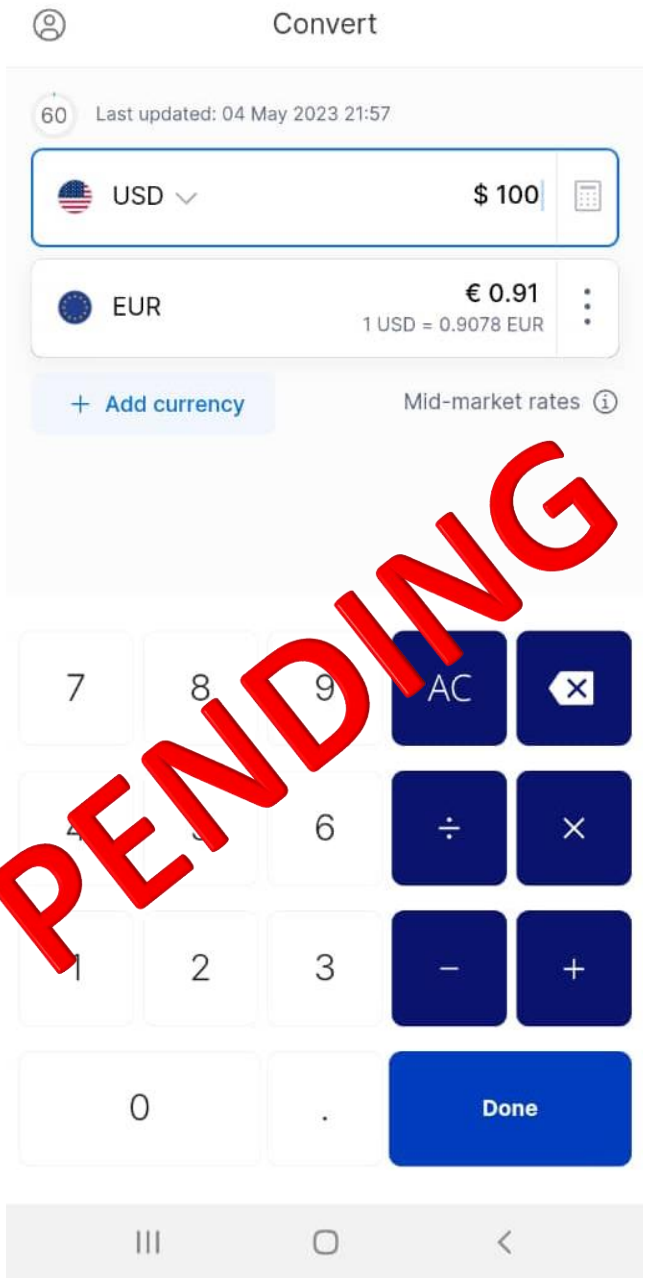
Screen3



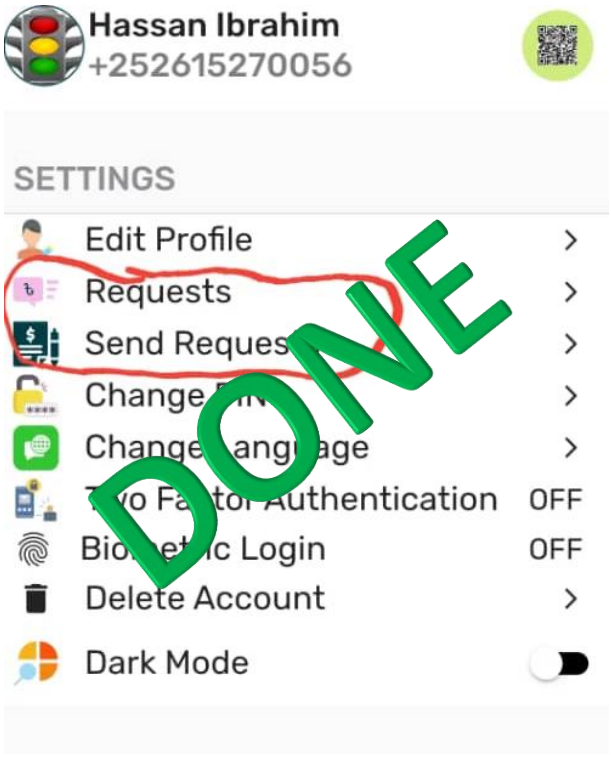
Screen4

3. Exchange

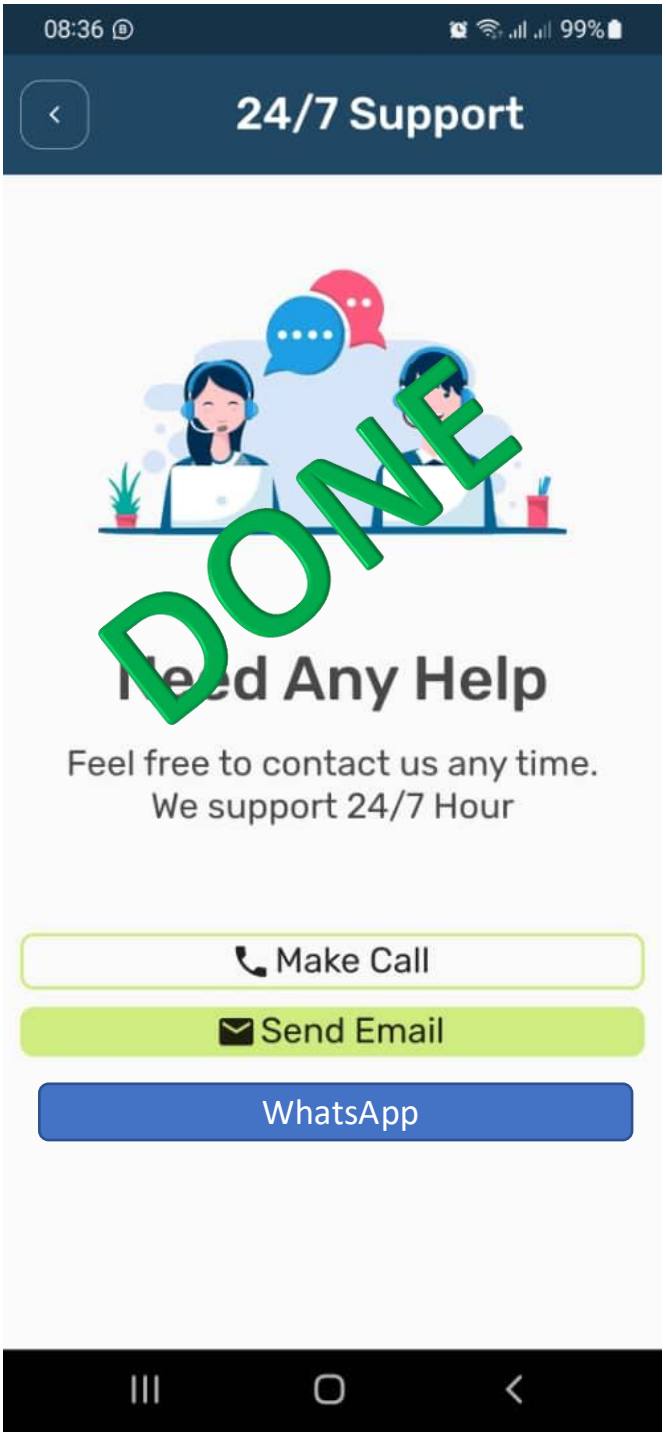
6. We need to change the Exchange design below.

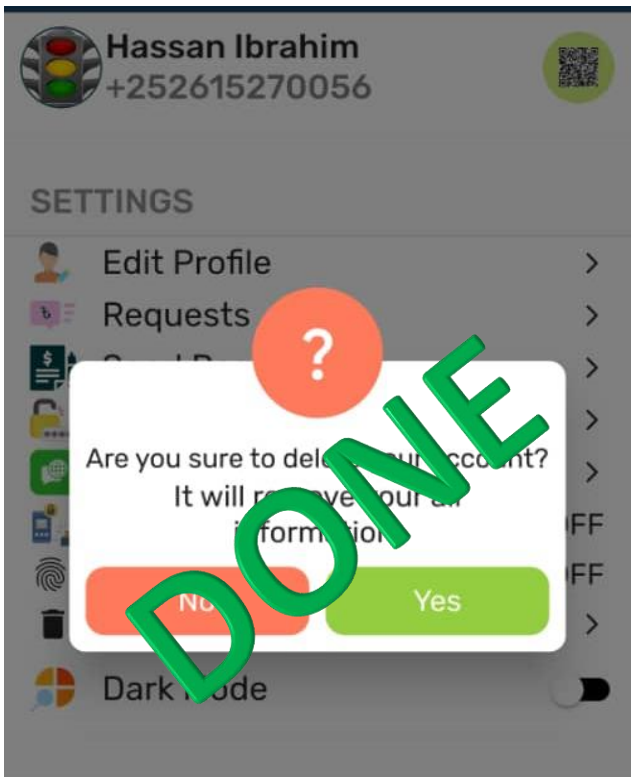


Remove these two fields no need in this area



We need to add button WhatsApp





We need to send OTP sms confirmation before delete account.
